

The successful program for teenagers takes place in the "Elite Way School", a high school that is well known for its high educational, cultural and social standards, since it is a boarding school and most of its pupils belong to the country's upper class.

A small number of low income children attend the school on scholarships. The story begins when third year students meet their new schoolmates, some of which are scholarship holders and others are not, and they all go to the school's summer camp. Four children with strong personalities – natural leaders - convene. They are Mia, Manuel, Marizza and Pablo. Despite their irreconcilable differences, they discover that they have something in common: their love for music. In time this will become a lifesaver for these kids, who will end up secretly forming a band together. There's a place in this world for everybody... but only rebel souls are able to struggle for that place and turn it into something better. This is what makes them immortal.

This Art Guide is dedicated to our fourth year students at the "Elite Way School". Feel free to work on the photographs with different techniques, using textures and backgrounds in different applications. You can pick and suggest other new approaches, as long as you stick to the style we are proposing here. This material also includes two sections dedicated to the two female characters in case you need to create specially directed lines. Enjoy yourselves and have fun designing modern and creative products.
